

LYRA DRIVER

600W

The **LYRA DRIVER** is a 600W, constant-current, programmable LED driver that operates from 90-305 Vac input with excellent power factor. It is created for high wattage lighting applications including horticulture, high bay, aquaculture and vertical farm lighting. It provides a dim-to-off mode with low standby power. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.
